DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Information Disclosure Statement

The information disclosure statement filed March 28, 2005 has been considered.

Double Patenting

2. Claims 1 and 4 of this application conflict with claim 1 of Application No. 10/530,026. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822. The edge processing step of the present Application is equivalent to the “partially overlapping “ in Application No. 10/530,026 of claim 1 and scanning the layer wherein a scan of a first area including first and second end regions, lying along sides of the first area is merely overlapping the scan area and/or edge processing.

Correction is required.

Objections

3. Claims 2-3 and 5-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
